Why Lugarde?

Lugarde develops, manufactures and delivers custom-made wooden summer-houses and outdoor enclosures from our **factory** with more than 7**0,000 m²** area. With over **40 years of experience**, we are your expert. Our products are characterised by their very own character and appearance. Our expertise is in customisation. From design to realisation, we have everything in-house, so the possibilities are endless. Lugarde offers **high quality at an attractive price.**

Sustainable

All suppliers of our wood are PEFC certified. It is also our mission to deliver our products **fully recyclable**. We keep waste wood and sawdust to an absolute minimum. Any waste is recycled and reused for other purposes, including heating our factory.

Dealers & show models throughout the United Kingdom

There is always a Lugarde dealer near you where you can check out our summerhou-ses and quality. They can advise you from design to implementation.
Find your nearest Lugarde dealer at www.lugarde.com

YOUR OWN DESIGN IN 3D

With our 3D configurator, you can design your ideal summer house entirely as you wish without any obligation. If you have specific requirements, our dealers are at your service.

CUSTOMISATION IS OUR STANDARD

All models in our brochure are fully customisable.

IN-HOUSE PRODUCTION

For 40 years, we have been designing and producing summerhouses from our factory. Because we make our wood to measure, the parts fit together perfectly, down to the millimetre.

ASSEMBLY SERVICE

Our products are delivered as complete construction kits. With clear assembly instructions and the autocad drawings for your specific design, you can easily assemble the kit yourself. But you can also have them assembled through one of our dealers in your area.

THE HIGHEST QUALITY WOOD

Our high-quality wood is sourced from the northern countries. Because of the cold climate, the trees grow relatively slowly there. Therefore, the annual rings are closer together, making the wood sturdy and durable.

TOP QUALITY WINDOWS & DOORS

* 3-point locking on almost all doors
* Solid doors & windows with a thickness of 6 cm!
* (HR++) Double glazing
* Laminated (to prevent warping), finger-joined and knot-free wood

5-YEAR WARRANTY

With a Lugarde product, you get a 5-year warranty on manufacturing and construction faults.

Cosy places to come together

Create a lovely place in your garden to enjoy all year round (warm and dry!).

10

Sports & Wellness

How awesome is that: straight from your garden into your own gym, sauna or hot tub!

60

Home workspaces

Working away from home but within walking distance ... in your own garden.

112

Vacation homes, B&B, guesthouses and more

From tiny house to wooden holiday villa, you can receive guests without any worries.

144

Hobby & DIY

Dreaming of a home studio? Or finally getting that DIY space? Be inspired by our many options.

166

Quality and materials

Whether it is doors or locks, wood or roofing: you get top quality down to the smallest detail.

NEW
DIMENSIONS POSSIBLE IN 10CM INCREMENTS

Our 3 building systems.

Pro system

Robust & modern look

The Pro system uses wide laminated posts, which the wall sections slide into, giving the summerhouse a robust and modern look.

- Laminated posts of 14x14cm
- No use of nails and screws as the walls are pushed into the posts
- Very stable construction
- Sleek and modern, but with a very robust look
- Unique customisation in 10cm increments!
- Available in as many as 3 wood species; spruce, Douglas and larch.
- **This includes all product codes starting with PS, PSL, PSD and PSM.**

EVERY MODEL IN THIS BROCHURE CAN BE FULLY CUSTOMISED TO YOUR NEEDS.

PS = SPRUCE WOOD
PSM = SPRUCE WITH SCAFFOLDING WOOD LOOK
PSD = DOUGLAS WOOD
PSL, PSML = LARCH WOOD

Prima system

Modern look

The Prima system is the perfect solution for a high-quality and customisable summerhouse. The sleek corner posts which the walls are slide into, give this model a modern look.

- Developed by Lugarde.
- Walls are slid into the corner posts without nails or screws. These corner posts have an aluminium inner core, which makes the construction exceptionally stable.
- Sleek corners for a modern look.
- **This includes all product codes starting with PR and P.**

EVERY MODEL IN THIS BROCHURE CAN BE FULLY CUSTOMISED TO YOUR NEEDS.

Log cabin system

Traditional & robust

The Log cabin system is made up of wooden wall sections stacked on top of each other so that the corners show a cross connection. This creates a robust and more traditional look.

- Stacked log construction
- The cross-connection provides a solid connection, allowing this system to offer many possibilities in terms of dimensions and design.
- The 68 mm and 90 mm wall thicknesses have a double tongue and groove for even higher stability.
- Unique customisation in 10cm increments
- **This includes all product codes starting with B and G.**

EVERY MODEL IN THIS BROCHURE CAN BE FULLY CUSTOMISED TO YOUR NEEDS.

Our wood.

Wood is a beautiful natural product with unique properties. It is exceptionally durable, easy to work with and has sound-damping characteristics that create pleasant acoustics. Wood brings life to any project with its warm and timeless look. Moreover, it is a renewable resource and contributes to CO2 capture. The natural variations in colour and refined texture give each summerhouse a unique character.

PRO SYSTEM, PRIMA SYSTEM
AND LOG CABIN SYSTEM
SCANDINAVIAN SPRUCE

Our spruce is of **high quality.** Characteristically, it has a light colour with a **fine wood grain** because it comes from northern countries with a cold climate, so the trees grow slowly, resulting in very strong and durable wood.
It goes well with different garden styles and can look both modern and classic, depending on the design and finish.

Because we make our wood to measure, the wood parts fit together perfectly, down to the millimetre. In general, a summerhouse made of Scandinavian spruce exudes a sense of **simplicity, purity and natural beauty**.

PRO SYSTEM
DURABLE DOUGLAS WOOD

Just like larch, Douglas wood is very durable. Our summerhouses made of Douglas wood have a **Swedish tongue-and-groove profile** that contributes to a **rustic and rural look**. The Swedish tongue-and-groove profile creates an overlap of the wooden boards, creating a charming, traditional appearance.

The natural character of Douglas wood, with its warm colour and wood grain, contributes to the cosy and attractive look of the summerhouse. Douglas wood can age over time, resulting in an even more authentic look. **If you do want a different colour, you can also counteract this greying by having the summerhouse treated by Lugarde or by treating it yourself with an oil or stain.** It is a popular choice for lovers of a country or cottage-style look.

Douglas wood lasts **10-15 years** untreated*

PRO SYSTEM
HIGHLY DURABLE LARCH WOOD

The pro system is an excellent choice for summerhouses because of its **durability and natural beauty.** This wood is known for its resistance to rot, fungi and insects, meaning your summerhouse will last for years **with little maintenance**.

Our summerhouses made of Larch consist of **straight boards**, giving it a modern look. Over time, the wood develops a **beautiful golden brown to grey patina**, giving the summerhouse a sophisticated look. The advantage here is that this wood **can remain outside untreated** for 10-15 years*.
Do you want to extend that life and/or prefer a different colour? Then have your summerhouse treated by Lugarde or treat it yourself with an oil or stain.

*Depending on location and weather conditions.

“A cosy place to get together, and at the same time, a storage space for our garden items.

We came to Lugarde because we wanted a combination summerhouse: On the one hand, we wanted to create a lovely space in our garden to enjoy with family and friends all year round. We chose glass sliding doors so that we can close it when it rains and open it completely when the weather is nice. On the other hand, we created a dense space to use as storage for our garden tools, garden cushions and other items. That way, we kill two birds with one stone! A practical solution and a lovely place where we can enjoy each other and the outdoors with friends and family.”

Laura Johnson (45)

“Having a good glass of wine together or a delicious dinner.... In a Lugarde, it's all possible!”

Henry Vanguard (41)

VV22 → 360x360 cm

View the Log cabin system from **page 122**

Want to use your summerhouse all year round?

Of course! We are happy to show you how. Here are some inspiration pages from several customers who have gone before you.

Cosy wood stove

We chose a summerhouse with glass sliding doors all around to enjoy our summerhouse during all seasons. In summer, we fully open them all, and in the colder months, we close them. The glass sliding doors are made of 10 mm tempered glass, but are not insulating. That's why we added a heater ourselves for the cooler summer evenings. When it gets really cold in winter, we light our wood stove. Besides getting warm, nice, and quick, sitting by the fire is also very cosy and atmospheric.

A BBQ with friends, or just a nice cup of coffee together? Whatever you use the summerhouse for, together you will make beautiful memories....

B36→ 500x550 cm

View the Log cabin system from **page 122**

A dedicated (play) area for your children...

Transform your summerhouse the ultimate play paradise for your children. An incredibly fun and dry place where they can play with their toys and friends for hours. Of course, there comes a time when your children get older and need their own space to 'chill' with friends. How ideal that there is a place where they can do that, at home, but still have their own space. This way, you and your partner can also enjoy the peace and quiet of your home and be in control of the remote control at night.

...or, of course, for yourself.

View the Log cabin system from **page 122**

A summerhouse for informal care

"We wanted to be able to care for our mother ourselves in her old age. Instead of the standard units, we wanted to create an atmospheric and cosy residence where she could feel at home. We found Lugarde and immediately fell in love with its beautiful wooden and natural look. The quality is super suitable for making an informal care home with good insulation and custom-designed rooms. My mother enjoys living with us, and the grandchildren love that their grandmother lives with them in the garden."

Betty Joseph (41)

Design it yourself.

Use our 3D configurator to create your own design, exactly the way you want. Customisation is our speciality, and we even offer dimensions in 10 cm increments. Start your own design now, discover all the possibilities and easily save your design to continue at a later date. Get all the information so you can think about it some more. Do you need help figuring this out? Our dealers are at your service.

- Instant itemised quotation
- Instant floor plan with all dimensions and heights
- You can admire your design in 3D (360-degree rotation)
- Virtually place your design in your own garden

Go to lugarde-configurator.com

Step 1

Choose a template

Type the product code in the input field to open the model in the configurator and you can customise the model to your needs. Would you prefer to design everything by yourself? Then start with a blank template.

Step 2

Fully customised design

Get started with the template and make your own choices regarding:

- Dimensions and wall types
- Roof shape and roofing
- (Garage) doors and sliding doors
- Windows
- Treatment and finishing
- Insulation and extras

Step 3

Enjoy your summerhouse

Easily save your design or send it to your nearest dealer for a consultation without obligation.

Wondering how your future summerhouse will look in your own garden?

With our 3D configurator, you can experience your design virtually right away. Decide on the ideal spot for your summerhouse, admire it from every angle and even step inside to imagine exactly how you will soon enjoy a cosy evening with friends and family.

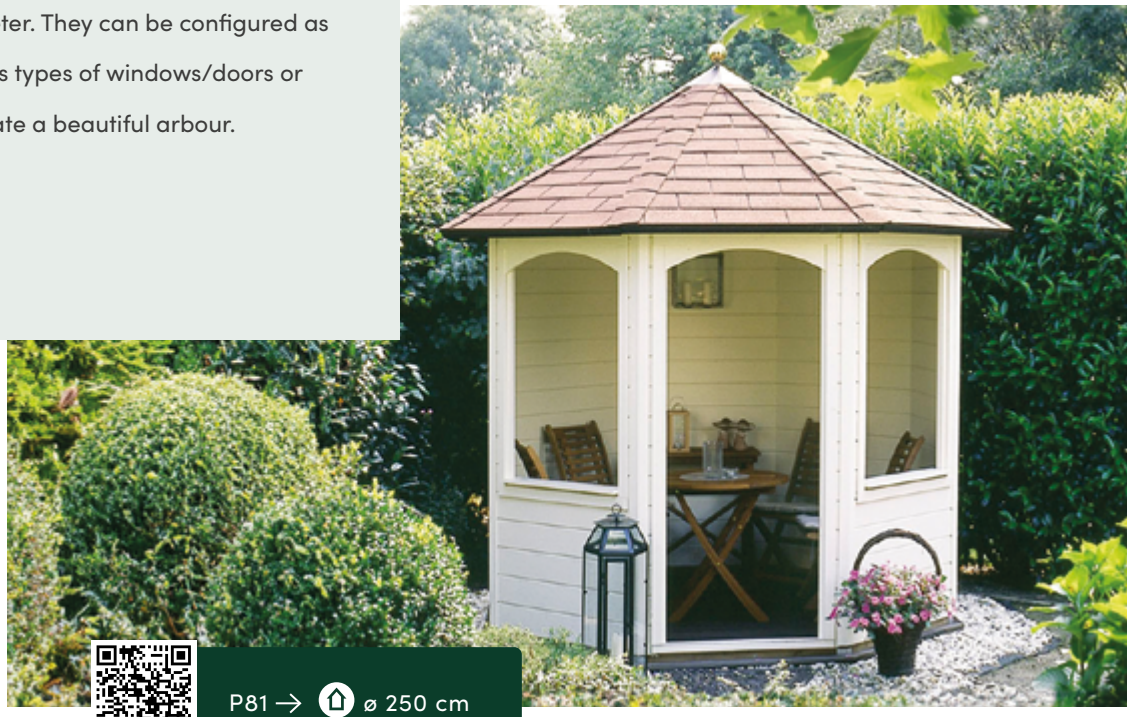
Octagonal summerhouses – a jewel for your garden

Octagonal summerhouses are available 250 cm and 300 cm in diameter. They can be configured as you wish, with various types of windows/doors or partially open to create a beautiful arbour.



P81 → ø 250 cm

P899 → ø 300 cm

Attached verandas

What could be better than having breakfast on your veranda on a beautiful Sunday morning? An attached veranda from Lugarde is an extension of your home. You can enjoy the garden and your spare time together in the sun and out of the wind.

You can assemble the veranda entirely as you wish:

- Sloping or flat roof
- You can optionally add balustrades, glass sliding doors or wooden walls.

Ask your dealer about the possibilities or create the desired design together with your dealer.

AM44 → 904x400 cm

View the Prima system from **page 69**

“We wanted a veranda with glass sliding doors as an extension of our living area,

so that we could step into our veranda right from the house. It is basically an extra garden living room attached to our house, where we can view our garden and enjoy the summer evenings and colder days for longer without having to go inside right away. Thanks to the glass sliding doors and the skylights, a lot of light enters, and in the evening we enjoy the sunset. An added benefit is the reduction in our energy costs because the veranda is a kind of buffer between the cold outside and our house, keeping our house cool in summer and warm in winter.”

Samantha Daniels (46)

Glazing bars or no glazing bars?

Some like classic, others modern. Some want cosiness, others a wide view. That is why at Lugarde you can choose windows and doors with or without glazing bars – something for everyone.

Design it yourself.

Use our 3D configurator to create your own design, exactly the way you want. Customisation is our speciality, and we even offer dimensions in 10 cm increments. Start your own design now, discover all the possibilities and easily save your design to continue at a later date. Get all the information so you can think about it some more. Do you need help figuring this out? Our dealers are at your service.

- Instant itemised quotation
- Instant floor plan with all dimensions and heights
- You can admire your design in 3D (360-degree rotation)
- Virtually place your design in your own garden

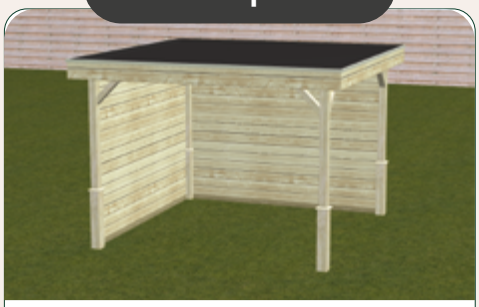
Go to lugarde-configurator.com

Step 1

Choose a template

Type the product code in the input field to open the model in the configurator, and you can customise the model to your needs. Would you prefer to design all by yourself? Then, start with a blank template.

Step 2



Fully customised design

Get started with the template and make your own choices regarding:

- Dimensions and wall types
- Roof shape and roofing
- (Garage) doors and sliding doors
- Windows
- Treatment and finishing
- Insulation and extras

Step 3

Enjoy your summerhouse

Easily save your design or send it to your nearest dealer for a consultation without obligation.

Wondering how your future summerhouse will look in your own garden?

With our 3D configurator, you can experience your design virtually right away. Decide on the ideal spot for your summerhouse, admire it from every angle, and even step inside to imagine exactly how you will soon enjoy a cosy evening with friends and family.

View the Prima system from **page 69**

Home workspaces

Because our summerhouses are fully customisable in size and design and can also be fully insulated, they are incredibly suitable as a home workspace.

Home office

"I wanted a better work-life balance. The fact that I no longer have to spend every day in traffic jams means I can use my time much more efficiently. It is also nice that I have my own space outside our house. This gives me the peace and room to work and keeps work and personal life separate. A bonus is the beautiful view of the garden every day."

Mario Johnson (41)

“Good balance between work & private life.”

Mario Johnson (41)

View the Prima system from **page 69**

Home office or grooming salon?

From a mini-office to a larger office. Or perhaps a combination? For example, think of a sports area combined with an office space, hobby room, storage space etc. The possibilities are endless. At Lugarde, you can configure any summerhouse with the rooms you want. Simply use our unique 3D configurator. Try it for yourself now, or contact your nearest Lugarde specialist.

Grooming salon at home

"After completing my training as a dog groomer, I was looking for a suitable location to start my grooming salon. I ended up at Lugarde. Because I can put the log cabin on my own property, it is straightforward for me to go home in between. I found it ideal that Lugarde allowed me to position the windows and doors at exactly the right height in the walls so that the tables and cabinets I needed could fit under and alongside them.

I am extremely happy with my salon, and the clients are happy that they can run around and play in the enclosed garden after their treatment."

Lydia Barns (43)

View the Log cabin system from **page 122**

A hair salon at home

"I have been a hairdresser for many years; I first worked in a salon and later took the plunge into self-employment. I started cutting at people's homes, but soon, I found that my back began to hurt because I didn't have a suitable chair. I also could not offer colour treatments in addition to haircutting because I did not have the right facilities to perform these treatments in people's homes.

To become more professional, I decided to contact a specialised summerhouse dealer in my area. They recommended a Lugarde log cabin because of the high-quality wood, solid windows, doors and other materials. Together with the dealer, I used the 3D configurator online to design a summerhouse that provides space for multiple hairdressing chairs, sinks, mirrors and cabinets. It also fits a small counter and has a separate toilet and waiting area. I am extremely happy that I took the plunge and now have my own salon at home. My clients also find it a special experience to get a hair treatment in a garden salon. Who doesn't want to get cut while looking out at the blue sky and beautiful flower garden?"

Betty Farley (44)

Hair salon at home? Or want to do manicures and pedicures?

Always wanted to start your own salon, but could never find a suitable and affordable space?

A Lugarde summerhouse offers the ideal solution!

On these pages you will find some photos submitted by our satisfied customers.

View the Prima system from **page 69**

A manicure and pedicure salon at home

„I did not have any extra space left in my house and actually did not want to have my salon in the house either as I wanted to keep my private life and work somewhat separate. Having started my salon in a summerhouse, I have been able to keep my private and work life separate but still enjoy the benefits. This way I am still close by, should my children need me or if I have time to be at home in between treatments. It's super-efficient and really makes my life easier because I don't have to do everything at home in the evening after work but can spread it out over the day, ideal!“

Deborah Cornwall (41)

Personal training & massage parlour at home

"I work as a personal trainer and masseur and run my own business from home. My focus is on helping clients achieve their exercise, fitness and nutrition goals. In that context, it is great to be able to train outdoors. To make this possible, I designed a summerhouse where I have an open but covered area for training, even when it rains. Next to this canopy, I have a room for giving massages and for all my training equipment. The warm look and natural feel of the wood make this room ideal for giving relaxing massages. I was able to house everything in 1 space with a minimal investment, this allows me to achieve maximum results!"

Carla Goodheart (39)

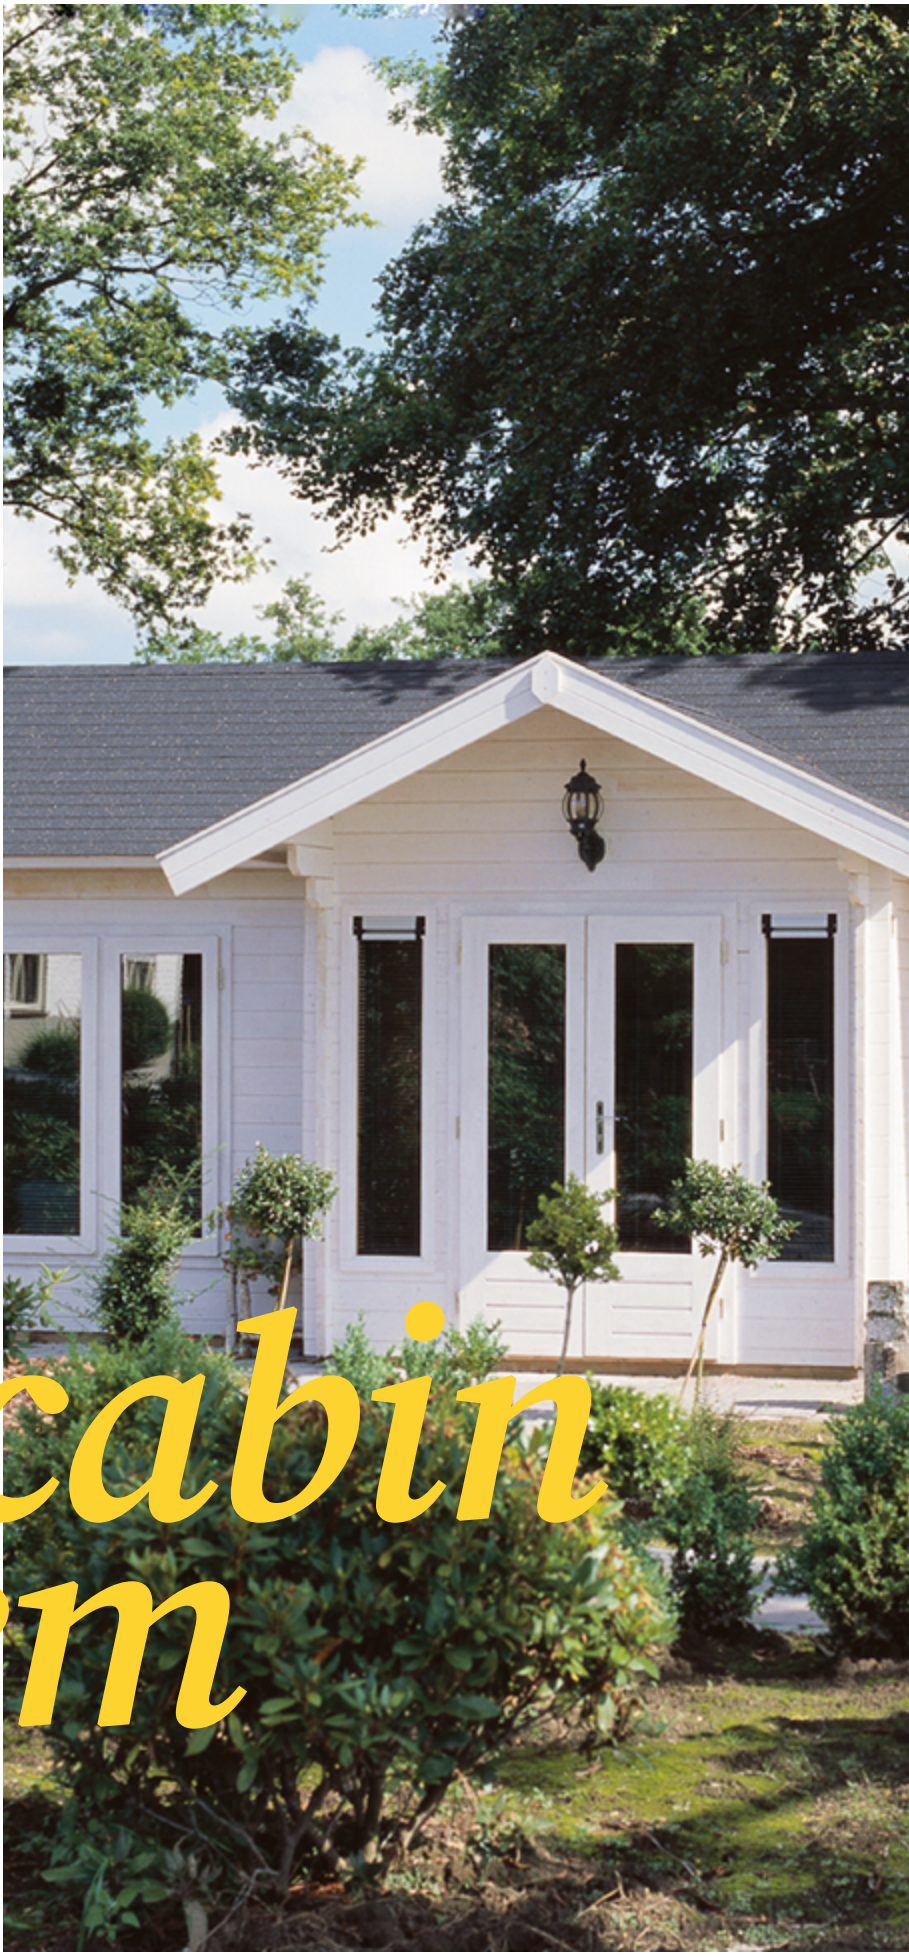
All materials are included!

Foundation beams, fasteners, fittings, roofing etc. With Lugarde, there are no surprises because everything is included! Nice extra detail: the fixing material comes in a nice sports bag, which you may of course keep.

Log cabin system



View the Log cabin system from **page 122**

Log cabin system

Traditional & robust

The log cabin system is made up of wooden wall sections stacked on top of each other so that the corners show a cross connection. This creates a robust and more traditional look.

- Stacked log construction
- The cross-connection provides a very strong connection, allowing this system to offer many possibilities in terms of dimensions and design.
- The 68 mm and 90 mm wall thicknesses have a double tongue and groove for even higher stability
- Unique customisation in 10cm increments!
- **This includes all product codes starting with the letter B and G.**

House dimensions (WxD) Awning dimensions (WxD)

All dimensions quoted do not include the roof overhang. For flat roofs, 23 cm is added per side, or 30 cm for gable roofs.

Find out more about the Log cabin system:
Scan the QR-Code

SCANDINAVIAN SPRUCE

Our spruce is of **high quality**. Characteristically, it has a light colour with a **fine wood grain** because it comes from northern countries with a cold climate, so the trees grow slowly, resulting in very strong and durable wood.

Roof shapes

Flat roof | Gable roof | Asymmetrical | Monopitch

Ground

Quadrangle | L-Form | T-Form

Awning

- Front awning
- Side awning
- Indoor awning

It is also possible to choose a deeper or shallower awning than the log cabin.

Wall thickness

44 mm | 68 mm

90 mm

Possible dimensions

Width in 10 cm increments: up to 2000 cm. *Smaller than 200 cm or greater than 2000 cm possible (ask for the possibilities) Depth (flat roof) max. 500 cm, (gable roof) max. 650 cm. *Greater depths available on request.

“We were looking for vacation homes for our campsite

so that our guests could enjoy the outdoors. We have fully equipped the Lugarde log cabins with a bedroom, living room, kitchen and a bathroom, providing all the necessary functionalities and luxuries for our guests to relax. We are very pleased with the quality offered by Lugarde, with the beautiful wood and colour, as well as the solid doors with 3-point locks so that our guests can safely leave their belongings behind when exploring the area. Thanks to the HR++ double glazing and insulation of the roof and floor, we can offer our guests a modern and comfortable stay.“

Hank Needham (46)

From very small to very large – we make your summerhouse entirely to your specifications and size!

Our log cabin system and Pro system can be adjusted down to the cm.* The Prima system offers adjustments in 60 cm increments:

View the Prima system from **page 69**

*In the configurator, dimensions are shown in 10cm increments, but would you like your design to fit down to the cm? No problem! Let the dealer know.

"Our master bedroom. The wooden roof boarding creates a wonderfully cosy atmosphere."

"We had bought a piece of land in Sweden

with a desire to build our second (vacation) home there. Friends recommended the Lugarde brand, and together with a specialist, we designed our ideal vacation home. We truly enjoy our beautiful wooden vacation home every time, which stays warm in winter and cool in summer thanks to double glazing and full floor, wall and roof insulation. We can highly recommend Lugarde and are immensely satisfied with the quality and service they provide."

Brooke Connor (41)

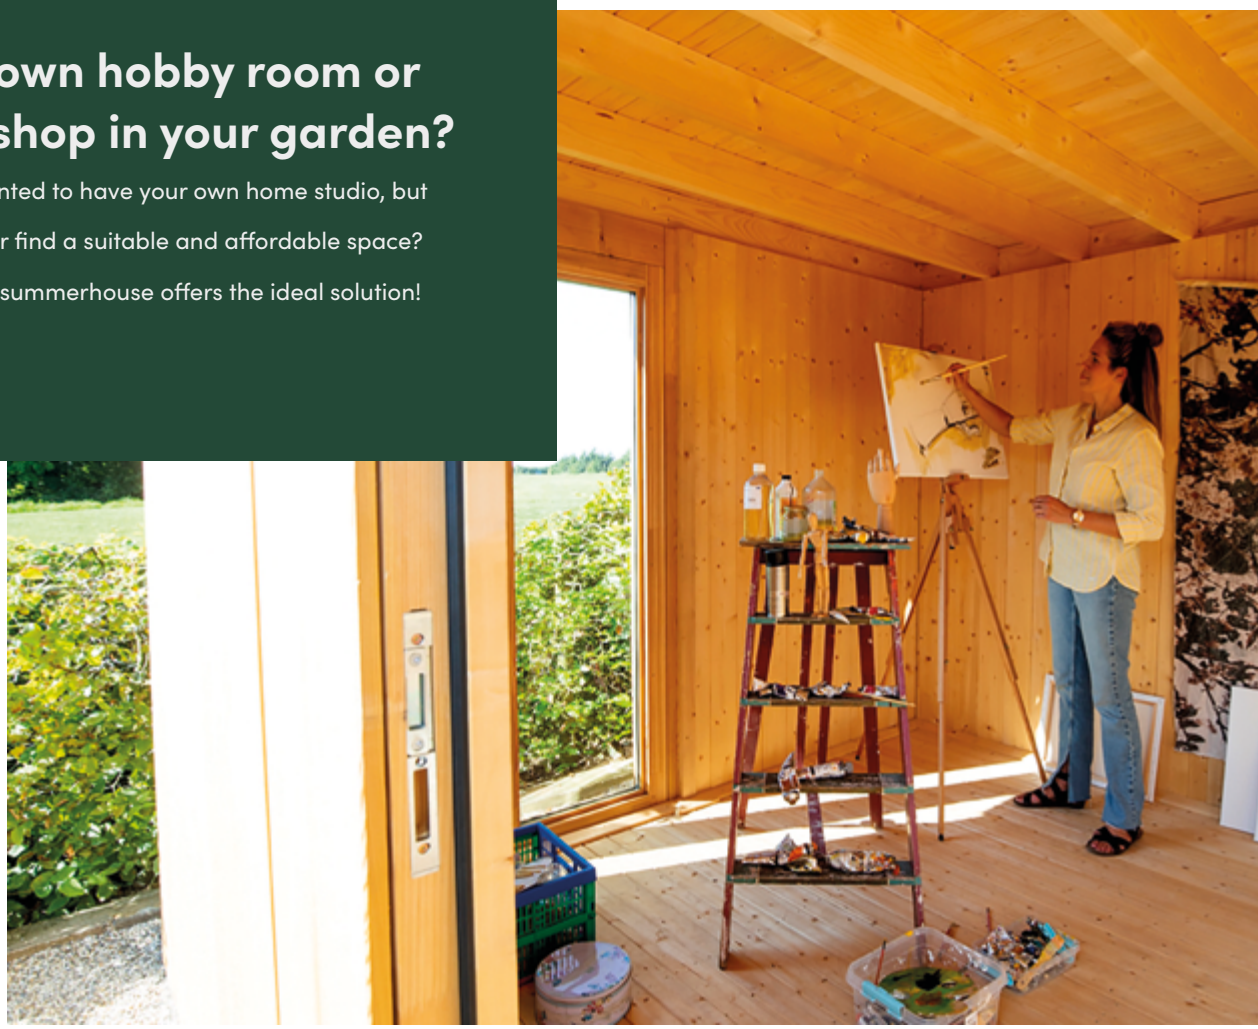
Your own hobby room or workshop in your garden?

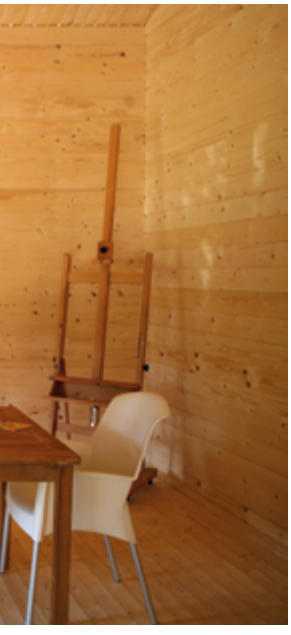
Always wanted to have your own home studio, but could never find a suitable and affordable space? A Lugarde summerhouse offers the ideal solution!



A painting studio at home

"For my painting hobby, I was looking for a space with lots of windows so that plenty of natural light is coming in. I discovered that I could put together my own summerhouse at Lugarde, where you could choose a lot of different types of windows. I chose large windows in several places in the summer-house. I greatly enjoy the relaxation that painting brings me. My own space in a quiet spot in the garden, with a wide view over the greenery and trees, also provides a lot of inspiration."

Hilda Cosworth (39)



My DIY space

"A private domain to pursue my hobby of tinkering with mopeds. Here, I can store my tools dry and protected and no one will disturb me, lovely! It is my space to do DIY but also to store garden items. We now also store our electric bikes safely here, as the door has a 3-point locking system as standard."

Randy Overton (52)

Douglas	✓	✓	✓
Spruce	✓	✓	✓
LOG CABIN SYSTEM	✓	✓	✓
WINDOWS/DOORS	✓	✓	✓

SPRAY IMPREGNATION
(PRE-TREATMENT)

With spray impregnation, all interior and exterior surfaces are pre-treated with an impregnating agent (primer). This gives your summerhouse a basic level of protection before and right after assembly.

GOOD TO KNOW

- You can select several colours per summerhouse/veranda.
- You still need to stain your summerhouse/veranda within 1 year. Within six months if it is white and as soon as possible if it is colourless.

ADVANTAGES

- Areas that are hard to reach after assembly are already protected.
- Protects wood against possible mould and decay after assembly.
- With this treatment, your summer-house / veranda is already primed.

COLOURS

COLOUR-LESS · WHITE · OAK BROWN · LIGHT GREY

GRAPHITE GREY · BLACK OIL · BROWN OIL

STAINING
(EXTRA PROTECTION)

With a staining treatment, your summerhouse has a protection that lasts 2-4 years, depending on weather influences and location.

GOOD TO KNOW

- You can select several colours per summerhouse/veranda.
- An even better finish can be achieved by lightly sanding the wood and applying another layer after assembly.

ADVANTAGES

- We treat windows and doors with 3 coats.
- Walls are first pre-treated colourlessly on the inside and outside and then stained in colour on the outside.
- Perfect protection against UV radiation and mould, and moisture regulating.

COLOURS

RAL 7037 DUST GREY · RAL 7021 BLACK-GREY · RAL 7032 PEBBLE GREY

TRANSPA-RENT OAK · RAL 9010* PURE WHITE · RAL 7039 QUARTZ GREY

BOILER PRESSURE IMPREGNATION
(LOW MAINTENANCE)

Pressure-impregnated wood is low maintenance and will keep for at least 10 years in all weather conditions. The wood takes on a beautiful greyed appearance over time.

GOOD TO KNOW

- You can choose the black or brown oil as an additional treatment to give your log cabin a nice deep black or brown colour or to counteract natural greying in the future.
- It takes about 6 weeks after assembly before (most of) the moisture is extracted from the wood. Drought and/or contraction cracks may appear.

ADVANTAGES

- Areas that are hard to reach after assembly are protected.
- Protects wood against possible mould and decay processes after assembly.
- Very low maintenance.

COLOURS

GREY · BROWN · GREEN

ADDITIONAL AFTER-TREATMENT OPTIONS

BLACK OIL · BROWN OIL

*In the case of opaque white staining, brown/yellow stains (resin from the trunk) may become visible.

Warranty? Of course!

We stand by our quality and service, which is why we offer as much as a 5-year warranty on manufacturing and construction faults.

Extras.

Balustrades & plinths

Balustrades Balustrades are a beautiful addition and demarcation of your awning / veranda. You can choose between vertical bars or a cross-design.

Plinths These beautiful decorative plinths (in 20 cm or 80 cm height) can be ordered for the posts to conceal the adjustable base.

Quality & materials.

Wood & fixing materials

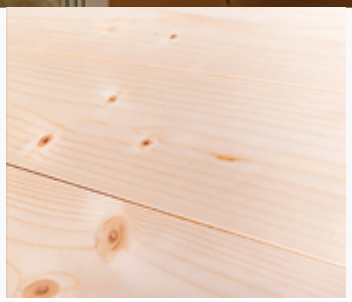
Thickness of posts per building system Prima & Log cabin system: 12x12 cm and fitted with metal (adjustable) base. Pro system has 14x14 cm thick posts and are fitted with a plastic base.

Foundation beams Boiler pressure impregnated foundation beams with clips.

Watch the video: scan the QR code Lugarde wood is strong and of high quality. The wood's quality is one reason why Lugarde products have such a long.

Fittings and fixing materials
Fittings and fixing materials are supplied in a nice sports bag, containing the assembly instructions and the specially made autocad drawings for your specific design.

Extra's.
Floors



Interior floor
Besides the fact that a floor offers comfort, an inner floor also offers protection against rising moisture from below. Lugarde's wooden floors consist of 19 mm thick planks, skirting boards and boiler pressure impregnated floor beams.

Attic floor
The attic consists of beams and a plank floor (including tongue and groove). If you want extra space (height), you can choose to raise the walls or opt for a steeper roof (26 degrees or more). We can also supply a suitable ladder for the attic of your summerhouse.

Exterior floor
Our exterior floors are made of Larch. Larch wood is similar to hardwood and is very durable. This makes the terrace floor weather resistant and requires no further treatment. The floor is profiled, 20mm thick and boiler pressure impregnated bottom beams are included

Insulation

Why insulate?
If you use your summerhouse or log cabin as a living space, we recommend that you insulate it. You can use your summerhouse as a home office, fitness room, extra living room or holiday home, for instance.

Floor insulation

- Consists of 40 mm thick thermal plates (60x120 cm);
- The plates are placed between the boiler pressure impregnated floor beams;
- The thermal plates fit perfectly between the floor beams. The floorboards are laid on top of these beams.

Double-walled insulation

- With this option, you get an extra inner wall made of 19 mm thick wall sections that easily slide together, thanks to the tongue and groove connections;
- Boiler pressure impregnated beams, which are fixed to the wall with special metal clips;
- Vapour barrier films (two different film layers);
- High-quality, 30 cm thick insulation plates.
- With flat roofs and wall insulation, it is advisable to opt for a ceiling due to the expansion and contraction of the exterior walls.

(Apex roof

Roof insulation

- Roof insulation can be ordered with all roofs;
- The roof insulation consists of 40mm thick plates (60 x 120 cm);
- Thermal conductivity (Lambda value of 0.027 W/m);
- Easy to install and consisting of environmentally friendly CE-certified material with FM approval;
- The boards are made of fibre-free PIR rigid foam and have a mineral glass fleece on both sides;
- Water-resistant;
- Special long asphalt nails are included. We also adjust the height of the bargeboards where necessary.

Quality & materials.

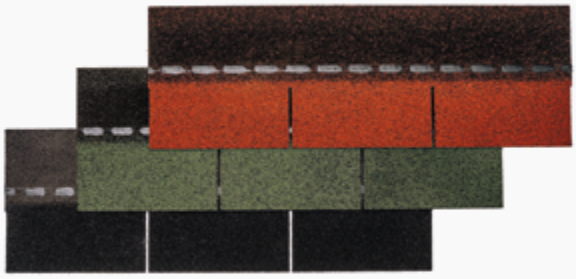
Roofings

SUPPLIED AS STANDARD WITH FLAT ROOFS.

Complete EPDM package EPDM membrane, roof gland & fixing adhesive.

Durable roof trims
Durable anodised aluminium roof trims provide a perfect finish.

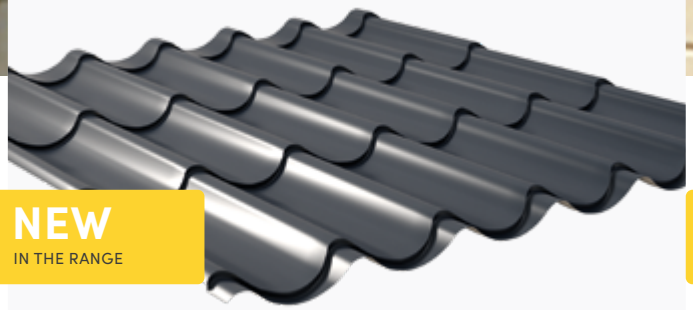
SUPPLIED AS STANDARD WITH POINTED ROOFS.



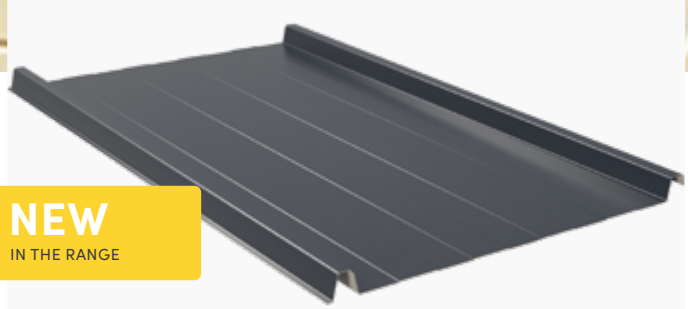
SHINGLES. Bitumen shingles roofing is durable and of high quality.

- Shingles are lightweight (and place barely any load on the roof structure)
- Flexible and easy to assemble. Because they are flexible, shingles are an excellent material to cover ridges and corners as well.
- You have a choice of colours: black, red or green.
- Supplied with fixing materials and, of course, assembly instructions
- In our 3D configurator, you can choose your desired colour of shingles and immediately see how it will look on your summerhouse!

Extras.



NEW
IN THE RANGE



NEW
IN THE RANGE

Casement windows You can open casement windows at the desired position and lock them in place with the window stays.

Watch the video scan the QR Lugarde windows and doors are of very good quality with a luxurious finish.

Glass sliding doors.

Enjoy all seasons.

With our glass sliding doors, you can enjoy the warm weather in spring and summer and the gentle breeze that blows in in the evening for a bit of cooling. When the weather gets cooler outside, you can easily slide them shut again. This way, you can fully enjoy the outdoors in all seasons!

Many sizes and designs possible
The glass sliding doors are available in many sizes. They can be placed under canopies, in summerhouse walls and also under your veranda.

Low maintenance
The glass sliding doors have aluminium stiles and muntins. Very low maintenance!

Handle included
An aluminium handle is fitted in the glass, allowing you to easily open and close the glass sliding doors.

Safety first!
The glass is made of 10 mm tempered glass.

High-quality rail system
Anti-draught brushes can be ordered to reduce draughts in the late season too.

Low threshold

Options:

- It is possible to order a cylinder lock case. It will be installed in the glass at the factory. This allows you to seal off your veranda from uninvited guests.

- Glass sliding doors are not fully insulated.
  You can order additional draught strips to keep the wind out as much as possible. With the steel look glass walls, the draught strips are already included.
  Tip! A stove or heaters ensure you can enjoy the outdoors in comfort in your veranda, even in autumn.

Various designs possible

The vertical muntins are fixed and cannot be changed. You can place the horizontal muntins wherever you like. This way, you can create your own desired modern or classic look. **The page on the right shows the options.**

Tip 1 - In our 3D configurator, you can add the glass sliding doors in any design and size. This allows you to decide which design you like most and which sizes are possible. Simple! **Quickly go to: www.lugarde-configurator.com**

Tip 2 – The glass sliding doors in the various designs described here are also possible as a fixed glass panel. You can find them all in our 3D Configurator.

Without muntins
giving you full view outside.

Multi-compartment muntin
distribution (horizontal + vertical) for a beautiful classic look.

Vertical muntins
distribution for a modern look.

Vertical with 1 horizontal muntin at the top
+ only on top 1 horizontal muntin distribution for a modern look with a classic touch.

Robust doors

Our robust doors are approx. 6 cm thick! They also feature a sturdy three-point locking system with SKG quality mark, the guarantee of burglary safety. This helps you keep out uninvited guests.

The advantages of the *wood of Lugarde* at a glance

Window/door wood and posts are laminated and finger-jointed to prevent warping.

We only process the good parts of the trunk into planks.

Very good quality wood from the coldest areas, making the wood stable, strong and durable.

Planks with large and/or falling knots are removed from the process.

All the wood is dried in special kilns to reduce expansion and contraction of the wood.

Window and door wood is knot free

All suppliers of our wood are PEFC certified.

Sustainability: We use our waste wood to heat our factory and the sawdust to make briquettes.

- All these windows and doors are HR++ double glazed (except (glass) sliding doors) Sliding doors are double glazed.
- All our windows and doors are made of laminated wood.
- Doors and windows can be fitted with muntins.
- Our muntins have a click system: ideal when staining and/or washing windows.
- The glass in all our windows and doors can be ordered in either opal glass (surcharge) or clear glass.
- The hinges of our windows and doors are adjustable. This is due to the possible expansion/ contraction of wood.
- The thresholds of the doors are equipped with an aluminium profile against wear and tear.
- All our single doors can be made right-handed free of charge. The doors are delivered left-handed as standard.
- Sizes indicated are daylight sizes. Width x height in mm.
- All doors are equipped with a three-point lock (except sliding and garage doors).
- Tilt-and-turn windows turn inwards.

Quality & materials.

PVC Windows & doors.

ADVANTAGES

Very durable
PVC windows and doors are of residential quality and therefore very durable.

Low maintenance
They require hardly any maintenance; you don't need to paint, sand or varnish. Simply clean with a sponge, water and a little detergent and they look wonderful again!

Provides a natural look
The wood grain on both the inside and outside preserves the natural characteristics and warm features of wood but still gives you the benefits of a low-maintenance product.

High insulation value
Our PVC windows and doors meet high insulation standards: HR++ double glazing (4+16+4 mm). Argon gas filled with a U-value of 1.0.

Supplied ready-made in colour!
Our PVC windows and doors are delivered to you in RAL colour 7021 (black-grey).

Other benefits and features:
- Aluplast profiles
- 5 chambers (air insulation)
- 2 rubber seals
- Aluminium stays in the colour black are also included
- Roto hardware (the world's best-selling tilt-and-turn hardware)
- The windows are fitted with a drip sill on the outside
- SKG quality mark (security hardware)
- We supply a wooden installation frame with all PVC windows and doors to account for the expansion and contraction of the wooden walls.
- Various types of windows and doors possible

Tip!
In our 3D configurator, you can place the PVC windows and doors in your summerhouse and immediately see how it looks!
