

COLLABORATING THROUGH REIMAGINING SPACES

EXP ARTS - EFFECTIVE CONTRIBUTORS

ARE YOU A YOUNG DESIGNER OR FUTURE ARCHITECT WITH A FLAIR FOR ART & TECHNOLOGIES?

Working on tasks individually or in groups, you will work across a range of exciting, creative projects in Art & Design and Technologies, to develop creativity, thinking and leadership skills. Using creative design briefs, model making, digital technology, drawing whilst enhancing your digital skills and critical thinking to ensure you are ready for the world of work.

L5 Skills for Work: Creative Industries

LEARNING INTENTION, SUCCESS CRITERIA & CAREER OPPORTUNITIES

Learning Intentions

I will:

- collaborate with wider industry partners, follow the Design Process, working with both Art & Design and Technology departments in a mixed year group setting to discover the many careers surrounding the Built Environment and Construction Industry.
- be able to adapt to work individually and as part of a team with deadlines and talk about my ideas in front of both pupils and industry partners.

Success Criteria

- I can
- use creativity to draw well using my hands and digital technology to enhance my ideas to show industry partners.
- use my initiative to both self and peer assess how successful my work is.
- use critical thinking skills to choose selection of appropriate materials and processes to develop my ideas.

Career Opportunities

- Architecture
- Interior Design, Art & Design
- Surveying
- Built Environment Engineering

The Four Capacities
