

# CRITICAL THINKING THROUGH MONEY MATTERS

## STEM - RESPONSIBLE CITIZENS

EXPLORE IMPORTANT EVERYDAY FINANCIAL PROCESSES AND HOW TO MANAGE YOUR MONEY!

Develop the skills and knowledge to manage your money confidently and responsibly. You will learn about budgeting, saving, borrowing, financial products, and financial planning, as well as how to make informed decisions about money in everyday life. You will have opportunities to apply your learning in real-life scenarios, work independently, and reflect on your choices, developing skills such as critical thinking, initiative, and focusing. The course introduces you to career pathways in finance, business, accounting, and digital banking.

### LEARNING INTENTION, SUCCESS CRITERIA & CAREER OPPORTUNITIES

#### Learning Intentions

I will:

- communicate financial ideas clearly using appropriate language, examples, and explanations.
- create personal financial plans or budgets to meet a given goal or scenario.
- take initiative when making financial decisions, considering options and consequences independently.
- think critically about financial information and options to make informed choices and solve problems.

#### Success Criteria

I can:

- plan and manage my own money by creating budgets and financial plans.
- research and compare financial products to make informed decisions.
- explain financial choices clearly and give reasons for my decisions.
- think critically about money, evaluating options and considering the consequences of my actions.

#### Career Opportunities

- Banking
- Accountancy
- Business Management
- Digital Finance
- Insurance and Risk

#### The Four Capacities
