Vetcal® D₃ mini

Tablets for cats and dogs

**Minerals
and amino acids**

**Calcium
without phosphorus**
90 mini tablets

Dietary Supplement for Dogs and Cats

Properties

Vetcal® D₃ is a formula that provides an alternative source of calcium that does not contain phosphorus. The sources of calcium are, among others: oyster shells and calcium lactate. The complex of vitamins D₃ + K improves the absorption of calcium and supports the functioning of the body. It is recommended to use the product for supplementing mineral / vitamin needs in dogs fed in a traditional way, where there is a large supply of phosphorus in the food.

Directions for use

1 tablet per 3 kg body weight / day
