

### **03 Food safety and nutrition policy**

Alongside associated procedures in 03.1-03.6 Food safety and nutrition, this policy was adopted by *Playways Preschool* on 01/09/25.

#### **Aim**

Playways Preschool is a suitable, clean, and safe place for children to be cared for, where they can grow and learn. We meet all statutory requirements for food safety and fulfil the criteria for meeting the relevant Early Years Foundation Stage Safeguarding and Welfare requirements

#### **Objectives**

- We recognise that we have a corporate responsibility and duty of care for those who work in and receive a service from Playways Provision, but individual employees and service users also have responsibility for ensuring their own safety as well as that of others. Risk assessment is the key means through which this is achieved.
- Procedure 01.3 Kitchen is followed for general hygiene and safety in food preparation areas.
- We provide nutritionally sound meals and snacks which promote health and reduce the risk of obesity and heart disease that may begin in childhood.
- We ensure that children are supervised at mealtimes and that children are within sight and hearing of a member of staff at all times and where possible staff are sat facing children when eating to ensure they are eating in a way to prevent choking and so they can prevent food sharing and be aware of allergic reactions.
- We follow the main advice on dietary guidelines and the legal requirements for identifying food allergens when planning menus based on the four food groups:
  - meat, fish, and protein alternatives
  - milk and dairy products
  - cereals and grains
  - fresh fruit and vegetables.
- Following dietary guidelines to promote health also means taking account of guidelines to reduce risk of disease caused by unhealthy eating.
- Parents/carers share information about their children's particular dietary needs and allergies with staff when they enrol their children and on an on-going basis with their key person. This information is shared with all staff who are involved in the care of the child.
- We take into account every child's development needs and work in partnership with parents/carers to help children move on to the next stage with regard to weaning as per the guidance below.

- Playways Preschool ensures that all staff are aware of symptoms and treatments for allergies and anaphylaxis and the difference between allergies and intolerances which may develop at any time.
- Foods provided by the setting for children have any allergenic ingredients identified on the menus.
- Care is taken to ensure that children with food allergies do not have contact with food products that they are allergic to.
- We notify Ofsted of any food poisoning affecting two or more children in our care as soon as possible and at least within fourteen days.
- Risk assessments are conducted for each individual child who has a food allergy or specific dietary requirement.
- If a child chokes at mealtime and intervention is given. We record details of the incident and ensure parents/carers are informed.
