

Dear parents and Carers,

On Monday 15th our young people in S1 are taking part in our very first Full STEAM ahead day. Instead of going to their normal classes, they'll be taking part in 3 workshops. Pupils can check their workshops which should be posted on their Teams pages in Science, Art and Technology subjects. If you have any questions, please get in touch.

Pupils should wear the school uniform and bring their charged iPads with them for the workshops

There are a few additional bits of information below for pupils taking part in the Tie Dye and Sphero Minigolf workshops.

Tie dye Workshop

If you are taking part in the tie dye workshop, we would ask you to bring an old piece of clothing to use. It doesn't have to be white, but it may not work as well on very dark fabrics. If you do not have anything, we can give you a small piece of fabric to use on the day, so you will still be able to take part.

Spheros minigolf

If you are taking part in the spheros minigolf workshop, it would be great if you could download the SpherosEdu app onto your iPad before Monday to save you time during the workshop."
