## Dietary Supplement for Dogs

### Properties

Harpagophytum procumbens (Devil's claw) aids mobility and joint movements of dogs as well as providing nutritional maintenance of healthy joints. MSM (methylsulfonylmethane) – is an organic sulphur compound that can be valuable for arthritis, joint pain and swelling. Supplementing the diet with additional MSM ensures the body's ability to naturally synthesise collagen for connective tissue health and maintains membrane flexibility.

### Directions for use

1 tablet per 20 kg body weight / day
