Syrup  
**for dogs and cats**  
**Joint Support**  
Devil's Claw  
Glucosamine  
Chondroitin  
MSM  
Hyaluronic Acid  
**250 ml**

## Dietary Supplement for Dogs and Cats

### Properties

ArthroMax® is a dietary supplement in the form of easily digestible syrup. Its components show chondroprotective properties and maintain proper joint functionality. Glucosamine and chondroitin are essential elements to the structure of the Cartilage, and help to maintain healthy joints. Hyaluronic acid (HA) is a key element of the synovial fluid which serves as a lubricant, shock absorber and improves the penetration of nutritional substances to tissues. Harpagophytum procumbens (Devil's claw) aids mobility (functioning of the musculoskeletal system) of dogs and cats. MSM (methyl sulfonyl methane) – is an organic sulfur compound necessary for the maintenance of joint tissues. Vitamin C is a natural antioxidant which is important to aid the structure of tissues and organs including skin, bones and blood vessels.
