

Job Description – Electrician

Company: Anelec Part of the Empower Group

Salary: £18.00 - £22.00 per hour depending on experience

Employment: Full Time

Location: Sites across North East of England

Reporting to: M&E Manager

About the Company:

Anelec is a growing mechanical and electrical contracting business working across the commercial, industrial and residential sectors, with a strong and expanding focus on renewable energy including solar PV, EV charging infrastructure, battery storage and heat pump integration. We are a close-knit, professional team who take pride in delivering high-quality, reliable work for our clients across the North East of England.

Anelec is part of Empower Technical Services a fast-growing UK technical services group whose mission is to unite complementary capabilities in Mechanical, Electrical, HVAC, Renewables, and Fire & Security to better serve commercial and industrial clients. Joining Anelec means contributing to essential infrastructure while benefiting from the scale, investment, and career opportunities of the wider Empower group.

Job Profile

The successful candidate will play a key role in supporting the delivery of high-quality electrical work across our commercial, industrial and residential projects. Working as part of a supportive, experienced team, they will carry out installation, testing, commissioning and fault-finding to a consistently high standard, including work on renewable systems such as solar PV, EV charging and battery storage. Working from drawings and specifications, and completing accurate certification and paperwork, they will help ensure every job is delivered safely, compliantly and to the standard our clients expect.

The role would suit a qualified electrician with a minimum of two years' experience post qualification. Candidates should hold an NVQ Level 3 in Electrical Installation (or approved equivalent) along with the 18th Edition Wiring Regulations and AM2 (Achievement Measurement 2). An ECS Gold Card is required, or the qualifications needed to obtain one. A full UK driving licence is essential, as is a current DBS check or a willingness to undertake one. Above all, we are looking for someone reliable, professional and committed to delivering high-quality work.

It would be advantageous, though not essential, for candidates to hold the City & Guilds 2391 (Inspection, Testing and Certification), a solar qualification, fire alarm systems certification, or SSSTS (Site Supervisor Safety Training Scheme).

In addition to a competitive salary, you'll have access to our employee benefits package, including a health cash plan (helping you claim money back on everyday costs like dental and optical treatment), life insurance, a workplace pension, the option to buy or sell annual leave, a cycle-to-work scheme, and a £1,000 bonus if you refer someone who joins us.

**Key Duties and Responsibilities**

- Carrying out electrical installation, containment, wiring and termination on residential, commercial and industrial projects.
- Inspecting, testing and commissioning electrical systems in line with BS 7671 (18th Edition Wiring Regulations).
- Fault-finding, diagnosis and repair on new and existing installations.
- Working accurately from drawings, specifications and schematics.
- Installing and connecting renewable systems such as solar PV, EV charging and battery storage where required.
- Completing installation and test certification and associated paperwork accurately and on time.
- Working safely at all times, following health and safety requirements and site rules.
- Maintaining tools, equipment and van stock, and representing Anelec professionally on site and with clients.

How to Apply:

Send you CV and Cover letter to info@anelec.co.uk
