5 902232 642155

Composition

5 ml of the formula contains:

Glucosamine sulphate	600 mg
Chondroitin sulphate	300 mg
MSM	250 mg
Hyaluronic acid	40 mg
Plant processing products:	
Harpagophytum procumbens	150 mg

Additives in 5 ml

Vitamins:	
Vitamin C	50 mg

Analytical constituents

Humidity 70%, Crude protein (<0.5%), Crude fats (<0.5%),
Crude fibre (<0.5%), Crude ash (<0.5%)

Directions for use

Dogs: under 20 kg body weight - 2.5 ml / day
 dogs over 20 kg body weight - 5 ml / day
 dogs over 50 kg body weight - 7.5 ml / day
Apply with a meal or orally.

Hyaluronic Acid
500 ml

Dietary Supplement for Dogs

Properties

ArthroMax[®] is a supplement in the form of easily digestible syrup. Its components show chondroprotective properties and maintain proper joint functionality. Glucosamine and chondroitin are essential elements to the structure of cartilage, and help to maintain healthy joints. Hyaluronic acid (HA) is a key element of the synovial fluid which serves as a lubricant, shock absorber and improves the penetration of nutritional substances to tissues. Harpagophytum procumbens (Devil's claw) aids mobility (functioning of the musculoskeletal system) of dogs and cats. MSM (methyl sulfonyl methane) – is an organic sulfur compound necessary for the maintenance of joint tissues. Vitamin C is a natural antioxidant which is important to aid the structure of tissues and organs including skin, bones and blood vessels.
