RED ALGAE  
OYSTER SHELLS

### Properties

**Dolviet Calcium** a natural source of calcium from red algae *Phymatolithon calcareum* (Lithothamnium calcareum) and oyster shells. Calcium aids the development of skeleton and dentition, especially in growing animals. Red algae also provide a natural form of other precious minerals which maintain healthy bones, muscles and heart. The formula is an excellent source of highly absorbable calcium and covers the requirements for calcium in BARF diet.

### Directions for use

1 measure (5g) for 10 kg body weight / day

DIETARY SUPPLEMENT FOR DOGS AND CATS
