To add a device:

Method①：QR code pairing

1. Connect your WIFI and BLUETOOTH on phone.This product supports only 2.4GHz Wi-Fi, not 5GHz Wi-Fi. Before configuring Wi-Fi, set the router parameters. When configuring Wi-Fi, make sure your router, phone, and device are as close as possible for quick device configuration.

2. Power on the camera and wait when you hear "the device is ready to config, please scan the QR ". (If you don't hear anything, click "reset" to restore the factory settings.).

3.

① click "Add Device" on the App homepage, select "Camera/Lock",

② "Smart Camera (WiFi)", and click "Next".

③Enter the Wi-Fi account and password and click "Next".

④Hold the phone screen in front of the lens (plus the picture), and the distance between them should be 15 to 20 centimeters. (Plus picture) Try not to shake the phone.

⑤ When you hear "Network config completed, connecting.", click "I Heard a Prompt", and then wait for the connection (with a picture). If connect failure,you will here" wifi config failed, please check user name and password'

⑥When the camera home page shows Added successfully,then click" Done"
