Custom built comfort

The Platinum Curve is hand built in the UK, to the exact measurements of your staircase, with the carriage being fully adjustable to your size and body shape.

Twists, turns and corners are no problem for your Curve, as the rail is tailor made to your individual staircase. With the Platinum Curve, you get a smooth, safe, comfortable ride and the freedom of your house once again.

In addition, the Curve's compact design and floor-mounted rail means it takes up as little space as possible and does not affect your home's decor.

For curved staircases, there is no better option than the Platinum Curve.

Curve with ERGO
Space seat and
ERGO Plus pad.

CURVE

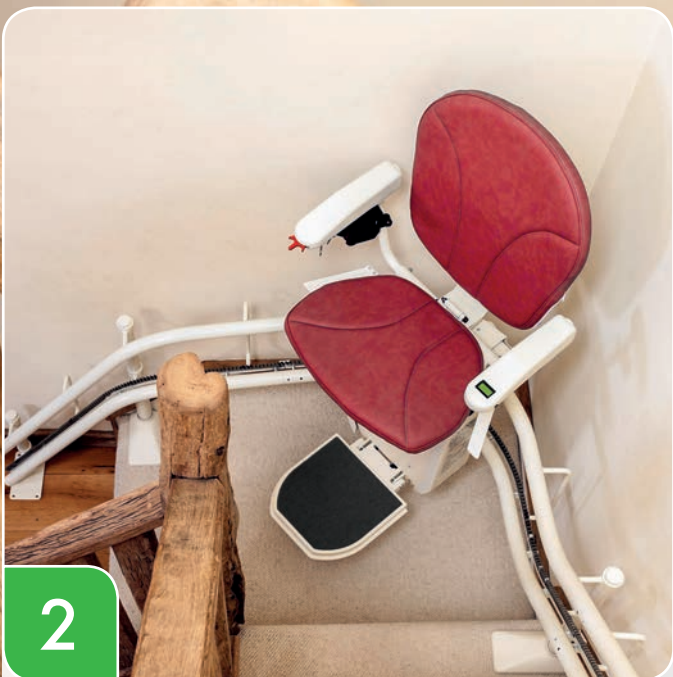

Reduce a whole staircase down to five simple steps

1

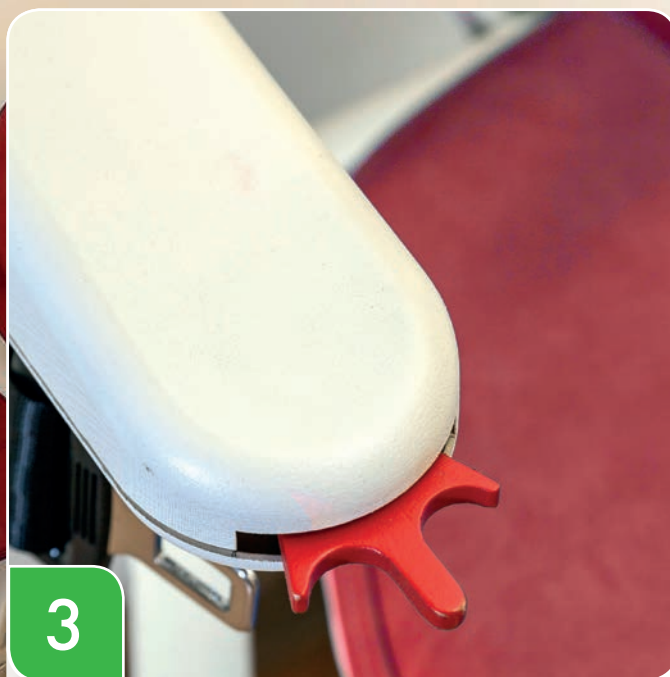

Lower the arms and the seat pad, put the footplate down and your Curve stairlift is ready to use.

The digital diagnostic screen will display 'Platinum' meaning you are ready to go.

2

Your Curve chair will be fully adjusted to your size and shape at installation, so all you need to do is strap yourself in, sit back, relax and enjoy the ride!

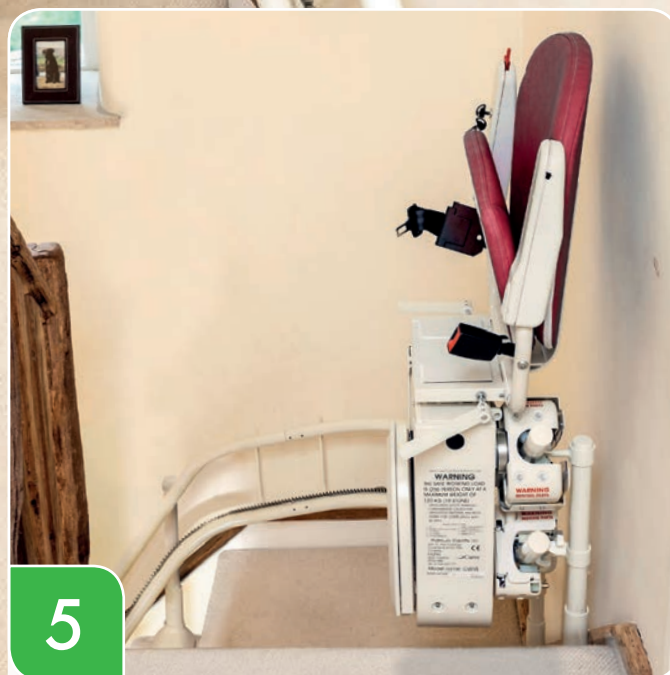

3

To operate your Platinum Curve stairlift, simply use the ergonomic joystick in the arm and lightly press in the direction you wish to travel.

4

At the top of the stairs, use the side-mounted swivel lever (or optional powered swivel), to turn the chair and safely step out onto the landing.

5

When not in use, your Curve stairlift can be folded and parked on the stairs, leaving clear access for other family members.

ERGO & ERGOHD

The Platinum ERGO seat is one of the most advanced stairlift seats available. Fully adjustable to the size and shape of the user, the ERGO comes as standard on the Platinum Curve. The ERGO HD model features an increased weight capacity, which can accommodate users up to 160kg (25st), without sacrificing the looks of the standard ERGO seat.

Ergonomic Joystick
Total control at your fingertips.

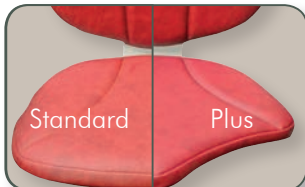

Digital Arm Display
Easy to read, real-time diagnostics.

Security Lock
Prevent unauthorised use of the lift.

Retractable Safety Belt
Additional safety when lift is in operation.

ERGO Seat Pad
Short or tall, ERGO fits all.

Lever Linked Footrest
Open and close with ease. Powered option also available.

Adjustable Seat Back
Allows for horizontal adjustment of the seat back. Combined with the multi-position seat pad, the ERGO offers multiple configuration options.

ERGO
up to
120kg
(19st)

ERGO HD
up to
160kg
(25st)

Safety Edge
Senses obstructions and brings the chair to a stop.

ERGOSPACE

The compact ERGO Space seat is designed for Platinum Curve stairlifts which are required to be installed on narrow staircases, where space is at a premium.

The ERGO Spce seat wraps around the user's body, positioning the back 60mm closer to the wall than on the regular ERGO seat. In addition, the Space backrest is shorter than the standard ERGO seat, eliminating any clash with the user's shoulder blades.

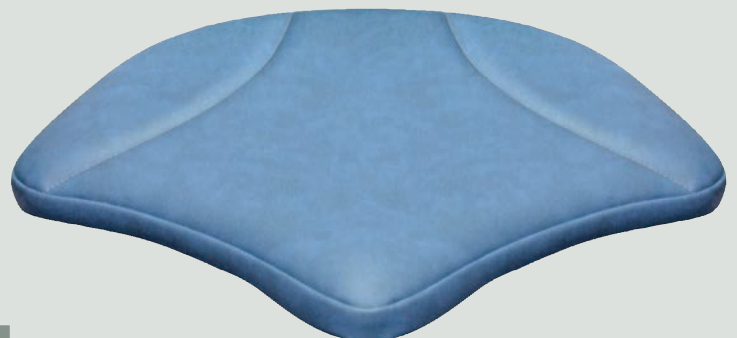

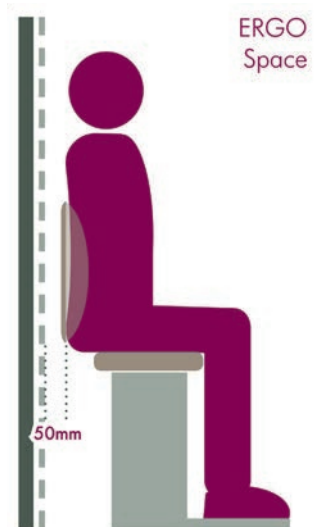

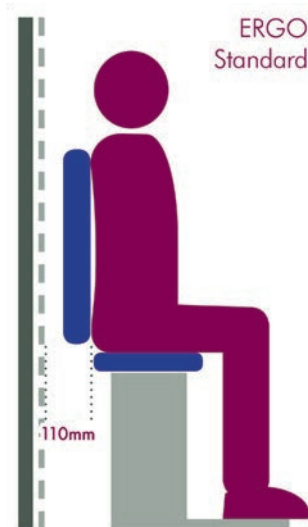

Weight
Limit
120kg
(19st)

ERGOPUS PAD

In some situations, a user with short legs may find it difficult to flex the knee over the edge of the chair, resulting in the leg being unable to reach the footplate.

The specially designed ERGO Plus pad features a contoured edge, allowing the user's upper legs to angle down and their feet to rest on the footplate. Adopting this more natural and secure seating position can save 25mm. The Plus pad is available on the ERGO, ERGO HD and ERGO Space.

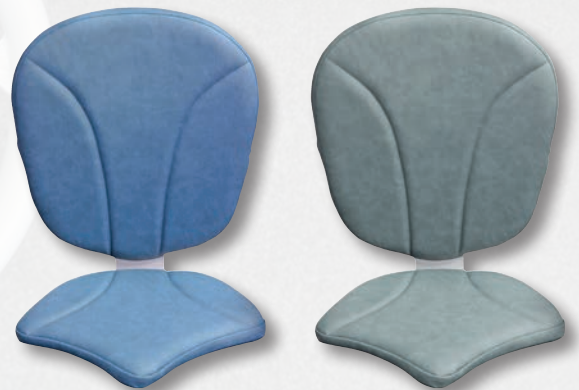

CURVE

ERGO Colour Options

Available on ERGO & ERGO HD.
